

Mayur Patil

Aspiring Product Manager | APM Intern | Product Intern

☎ 9607519712 ✉ patilmayur161625@gmail.com 🔗 LinkedIn 📁 Portfolio 📍 Jalgaon, India

PROFESSIONAL SUMMARY

BBA student with hands-on experience building and improving digital products from user research to MVP launch. Conducted 35+ user interviews across two product projects, identified customer pain points, prioritized features, and iterated solutions through structured feedback cycles. Skilled in product thinking, user research, MVP scoping, competitive analysis, and customer-centric problem solving. Seeking Product Intern, Associate Product Manager (APM), and Product Analyst opportunities to contribute to product development and business growth.

12th

Apr 2021
Percentage : 80%

PROJECTS

TripKhata - Group Expense Tracking PWA | 📁 Demo 📁 GitHub
Product Builder

- Conducted **20+ user interviews** to identify pain points in group expense splitting, settlement tracking, and travel transparency. □
- Synthesized research findings into key user requirements and defined the MVP scope and feature priorities. □
- Designed a frictionless onboarding flow enabling users to create trips and log expenses in **under 2 minutes**. □
- Implemented a **minimum-transfer settlement system** to simplify group payment settlements and reduce transaction complexity. □
- Introduced WhatsApp PDF expense sharing based on feedback from **10+ users** and refined product workflows through multiple feedback cycles. □

Technologies / Tools Used : Figma, Notion, Chatgpt, Github

IronAI — AI Fitness Assistant for Hostel Students | 📁 Demo 📁 Github
Product Builder

- Conducted 15+ user interviews and competitor analysis to identify consistency and motivation as the top retention blockers for beginner hostel-student fitness users.
- Scoped and shipped MVP — streak tracking, rest timers, workout history, progress visualization, offline mode — within 6 weeks using a severity-vs-effort prioritization matrix.
- Collected feedback from 15+ users across 3 iterations and refined engagement mechanisms based on recurring behavior patterns.
- Maintained low-friction UX as a core constraint, reducing time-to-first-workout to under 60 seconds validated through usability testing.
